Polyamide Technology

LDR® - High Quality polymerization plant

AQUAFIL Engineering GmbH (Berlin, Germany) received the contract for a new polyamide (PA6) polymerisation plant in China. AQUAFIL Engineering delivered the technology, engineering, license and key equipment.

The plant will have a total capacity of 200 tons/day. The latest “Lactam Direct Recycling” – High Quality (LDR® - HQ) polymerisation technology is implemented to achieve highest quality at low production costs. The plant is in construction phase and will have a big variable range of products.

AQUAFIL Engineering has long experiences in design and construction of new and complete continuous and batch polycondensation plants for Nylon- and Polyester-Polymers for different applications like textile, film and bottle grade polymers. AQUAFIL Engineering also offers services for plant optimization, plant extension and modernization or revamping for own as well as for third party technologies.

For more information regarding LDR® - HQ, please contact us.
