AQUAFIL Batch Polyester Plant Start-Up

AQUAFIL Engineering GmbH (Berlin, Germany) have started a Polyester Batch Polycondensation Plant in Thailand with its new Batch Technology.

The capacity of the plant is 80t/d. The batch plant give the possibility to produce various polyester grades with different additives. Due to this fact, the plant is also equipped with a new ethylene glycol (EG) recovery system, which allows to produce pure glycol with low DEG content from spent EG.

Discover our new technologies and contact us.

AQUAFIL Engineering has long experiences in building and designing continuous and batch polycondensation plants for PET polymers for textile, film and bottle grades.
