## AQUAFIL LBT® Polyester Plant Start-Up

AQUAFIL Engineering GmbH (Berlin, Germany) announces the successful start-up of a Polyester Polycondensation Plant in India with the new LBT® Technology.

SPARSH and AQUAFIL team are very proud about the smooth and successful start-up within shortest time.

The new LBT® technology is producing first grade polyester quality for film with different additives and achieves a further reduction in conversion costs for PET.

Sparsh Industries Ltd., established in 2009, is a reputed manufacturer and supplier of polyester films marketed under the brand 'SPARSHPET'. With state-of-the-art manufacturing plant and committed work force, Sparsh Industries continuously strive to meet the commitment towards total customer satisfaction.

AQUAFIL Engineering has long experiences in construction and design of continuous and batch polycondensation plants for PET polymers for textile, film and bottle grades. Aquafil Engineering has sold more than ten plants with previous technology version (2-Reactor Polyester Technology) for various applications with or without further direct processing of melt.

Discover our new LBT® technology and contact us.
